

HAIR STYLING ATTACHMENT

ABSTRACT

A hair styling attachment including a main housing and at least a pair of
5 hair treating members, the hair treating member includes at least a thermally
conductive hair treating surface, the pair of hair treating members being adjacently
disposed with the corresponding hair treating surfaces on the pair of adjacent hair
treating members generally in compressive contact, the corresponding hair
treating surfaces on the pair of adjacent hair treating members being relatively
10 displaceable to form a gap for receiving the hair to be treated, the main housing
includes an air inlet and the hair treating surface being communicable with the air
inlet.
